Experiment - 3 date: 30/07/2026

Aim -

To understand environment of cisco packet tracer to design simple network.

Procedure

Analyse the behavior of network devices using CISCO PACKET TRACER simulator.

1. From network box, click and drag and drop.
   a. 4 Generic PCs and One HUB
   b. 4 Generic PCs and One switch.
2. Click on Connections
   a. Click on copper cable.
   b. Select a PC and connect to HUB using cable LED should glow green. Connect all 3 PCs likewise.
   c. Connect 4 PCs to the switch using copper cable.

3. Click on the PCs connected to hub, go to desktop, click on IP configuration and enter IP address.

Click on the PDU (message icon) from the tool bar.

a. Drag and drop it on one of PC then drop it on another PC connected to HUB

4. Observe the flow of PDU from source PC to destination PC by selecting Realtime mode of simulation.

5. Repeat step #3 to step #5 for the PCs connected to the switch.

6. Observe how HUB and switch are forwarding the PDU ~~and~~

Result - Successfully observed and analysed the behaviour of networks using CISCO PACKET TRACER simulation.
